Features under development

    Menu in reading mode

Changes to be included in next release

    Fix for buggy rotation of pages that specify their own rotation (PDF)
    XPS and basic CBZ support (no CBR yet, sorry)
    EPUB, TXT, RTF, HTML, FB2, CHM support   Thanks to CREngine
    Input passwords for PDFs
    Help page
    Cursor support in inputbox
    Bug fix in menus
    shortcut for manual full screen refresh, Shift+R.
    configurable entry in .reader.kpdfview.lua for partial refresh counts.
    improved memory usage control
    Text highlight in DjVu
    Bug fix in screen saver

kindlepdfviewer-7b120b0 (Release 2012.03)

    DJVU support
    Human readable and editable settings files
    New key binds Home, used to exit program directly while reading
    One bug fix in fit-to-content mode
    Two bug fixes in two column mode
    Compile with optimization options enabled, much faster
    Jump history can be restored when you open the book next time
    Notes support for jump history. notes are auto generated according to the TOC section where the page is in. you can change it by editing the book setting file (the one that generated in the same directory with your book).
    New two column mode without margins, invoked by Shift+F
    Improved file browser:
        Navigate throughout entire filesystem
        Manage unreadable dirs
        Show current path on last line;
    Add "single file mode": if kpdfview called without any file/folder param, open last viewed file;
    Bug fixes in reading Table of Content
    Duokan style menu item shortcuts
    Fast jump by percent, refer to the move section in Short Cut Guide.
    The behavior for page turn is now consistent with kindle native reader in fit_to_content_width mode. (i.e. do a real page turn until hit page bottom)
    You can now change default settings for your reader in .reader.kpdfview.lua. Refer to settings section of user guide.
    Manual page crop, refer to Short Cut Guide.
    90 degree rotation support. Shift+K and Shift+J.
    Reading progress bar with Key Menu.
    Goto input box in reading mode.
    Rewrite caching strategy.

kindlepdfviewer-09c6c10

    Bug fix in toc entry, delete empty boxes at the end of the entry (please fire a bug report if you still find empty boxes in TOC entry)
    Bug fix in shiftmode and altmode recording
    Bug fix in refreshing screen after kpdfviewer exits
    Bug fix in filesearcher. (search recursively now)
