

CHAKIB BENZIANE

FRONTEND UI/UX ENGINEER

“

*I've missed more than
9000 shots in my career.
I've lost almost 300 games.
26 times, I've been trusted
to take the game winning
shot and missed. I've failed
over and over and over
again in my life. And that is
why I succeed.*

ABOUT ME

Hi, I'm a CHAKIB BENZIANE and I'm a frontend engineer and web project manager from Algiers, Algeria. With a prior experience in Full Stack and DevOps I currently specialize in developing state of the art web UI/Applications for desktops, mobile / tablets, and public displays using technologies like Angular, Node, Sass/Less, Cordova and node-webkit.

RESUME

EMPLOYMENT

January 2013 - Present
Freelancer

Frontend Engineer / Hybrid Web Project Manager

Developing modern critical web UI/Applications for browsers and mobile/tablet using technologies like Angular, Grunt, Node, Sass/Less and Cordova

2011 - Present

Entrepreneur Paris/Berlin

Bitcoin Development / Consulting

I believe in Bitcoin (the protocol) as a new paradigm in information technology with an unprecedented impact on economy, freedom and society as a whole. It is therefore a responsibility to educate people and create services that will provide the infrastructure that will drive the adoption of Bitcoin and proof-of-work decentralized networks.

January 2011 - March 2013

Jib.li (Former BoxLS) Paris

CTO - Founder

Jib.li makes use of surplus luggage space to deliver shipments. Often described as an "AirBnB" like for luggage and shipments. As CTO, I developed the web platform and managed a team of developers.

September 2010 - December 2010

SmarJog Paris

IT/Network Engineer

- System and Network administration
- Open source virtual infrastructures administration (research, development, performances benchmarks)
- Ldap services deployment/migration
- Implementing an Ldap Keyserver in Python
- Distributed file-systems and live virtual machine migration (KVM)

January 2012 - March 2013

Le Bocal - EPITECH Paris

IT/Network Engineer

- System administration
- Network provisioning
- Server maintenance
- Research in network deployment Windows/Linux

CHAKIB BENZIANE

FRONTEND UI/UX ENGINEER

EDUCATION

2009 - 2011
Computer Science Engineering
EPITECH

2007 - 2009
Mathematics - Computer Science
University Pierre Et Marie Curie

2005 - 2006
Medical Studies
Medical University Of Algiers

PORTFOLIO

MAKE UP MADE EASY *Lancôme (2013)*

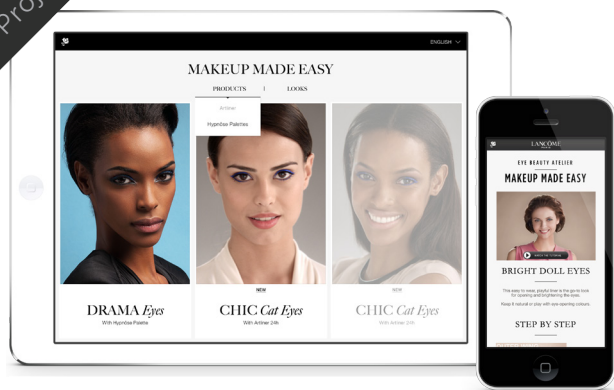

SIMPLIFIELD *Simplifield (2014)*

LesPeoplePassentLeBac *NRJ12 (2014)*

TheBeautyst **Current project*

Success Project

Make Up Made Easy 2013

For the launch of a new brand of beauty products, the client (**Lancôme**) want a Point Of Sale application to run on iPads as well as a mobile app interaction.

The POS application content had to be updated and managed remotely using push technology.

The client wanted a hybrid approach using web technologies for a more flexible app development

Development Workflow

The project involved an international team with a design company from London and project manager in Paris.

I made delivered two different iPad POS applications and one mobile app over the span of 6 months.

Key Features

- Custom html5 video player
- Video navigation by chapter
- Multilang subtitles and content
- Multilang video subtitles
- Animated products showcase
- Safari and Retina display ready
- Custom carousel swipe effects

Technologies

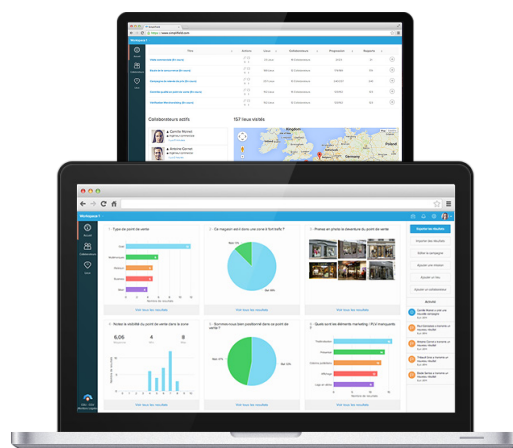

- Javascript
- Angular JS
- Cordova Hybrid Web/Native
- Backoffice admin
- POS touch experience
- SASS

Simplifield 2014

For this client my work involved developing UI and UX for the dashboard side of a data analytics web application.

I developed custom chart directives and enhanced modal module, both adapted to the clients API data structure.

The API was not ready yet, so I made API mocks to develop the Angular directives.

Development Workflow

Based on the client specifications, I first developed customizable angular modules with the base features.

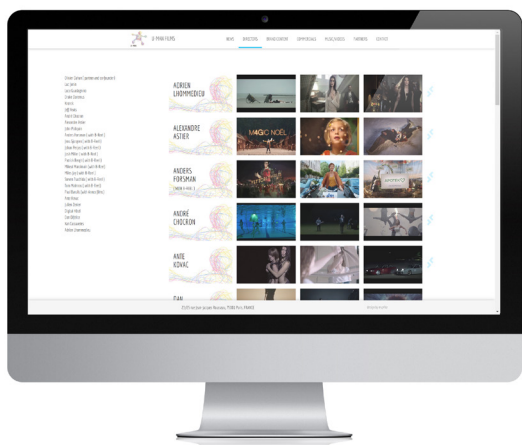

More detailed features were delivered over an iterative process on top of the base modules thanks to Angular technology

Key Features

- Custom responsive chart directive
- Modular modal system with embedded views and lateral menu
- Google UX inspired forms
- Responsive and dynamic table directive
- Media gallery

Technologies

- Javascript
- Angular JS
- Ng-grid
- D3.JS
- LESS
- CSS3/SVG

Key Features

- Thumbnails video swiper
- Minimalist design approach
- Backoffice admin interface
- Vimeo video API integration

U-man Films 2013

The client is a publisher in the video making industry.

I helped the client define a styles tile and made several UX proposals and designed the UI with a pure minimalist approach in order to make the media content stands out.

I also developed a touch ready swipe directive using angular and idangerous swiper.

Technologies

- Javascript
- Angular JS
- Backoffice admin
- LESS/Bootstrap
- Idangerous swiper

Jib.li 2012

As a CTO and CoFounder on the project, I designed this service all the way up from backend to frontend. I managed a team of developers to prototype and build the web service using Agile Development methods.

Jib.li was featured on many website and newspapers like *BBC*, *VentureBeat* and *Lemondr*

Development Workflow

The prototype was developed under 6 months by a team of 4 developers including me as a CTO.

I managed the development of a custom deployment platform like Heroku using uwsgi.

A new frontend was developed from scratch using AngularJS which was my first experience with the framework.

Key Features

- Custom html5 video player
- Video navigation by chapter
- Multilang subtitles and content
- Multilang video subtitles
- Animated products showcase
- Safari and Retina display ready
- Custom carousel swipe effects

Technologies

- Javascript
- Angular JS
- Cordova Hybrid Web/Native
- Backoffice admin
- POS touch experience
- SASS
